

Christmas donation 2020 for children and young people of the region

The staff of ACTech GmbH has committed itself to supporting people who are in need of help also in this - particularly challenging - year. That's why ACTech employees voted again in 2020 on which institution should benefit from this year's Christmas donation.

ACTech donates 5.000 Euro to Kinderarche Sachsen e.V. for two educational residential groups in Lichtenberg and Niederbobritzsch.

The curative-educational-therapeutic residential group in Lichtenberg is a residential community for up to 12 children and youths. The institution has set itself the task of emotionally stabilizing the young people, providing them with intensive academic support and assistance in the training and development of individual interests and skills.

The Intensive Pedagogical Group in Niederbobritzsch offers a small residential community for children and youths between the ages of 5 and 16 who suffer from mental disorders due to traumatization and particularly critical life courses. The goal is to provide the residents with a healthy social environment and thus reduce or eliminate individual difficulties and impairments.

We consider both projects very important and are happy to support them!
