

Christmas donation 2023 – 5,000 Euro from ACTech to Regenbogen e.V. in Freiberg

2023 – a year we look back on with fondness. We completed many great prototype projects and drove forward exciting developments. The increased work in the Giga Castings, Huge and Heavy, and Small Series market segments not only brought beads of sweat to our foreheads, but above all drove us forward – to new solutions and an expansion of our capacities.

In the midst of the year-end rush, however, our employees had another very special task: choosing the recipient of this year's Christmas donation.

They took this task very seriously and, with over 50% of the votes, chose the “**Regenbogenhaus e.V.**” project in Freiberg. Regenbogenhaus is a restaurant and hotel that trains people with learning and intellectual disabilities for jobs in the hospitality industry. When we presented the donation on site, we realized once again what a good choice our team had made.

The Regenbogenhaus e.V. association was founded in 1997 and currently employs 10 people with disabilities in the inclusive company on the basis of an employment contract under the guidance of 4 qualified specialists. More than 15 young people have already been placed in employment after completing their vocational training.

Now there is only one thing left for our team to say: We wish you and your families a wonderful Christmas and a good start to the new year 2024.
